

Monitor Your Entire Plant Operation From a Single Location

Columbia's CommandView is an integrated, component-based operator interface with all the features you need for effective monitoring and control of your manufacturing process. CommandView offers a windows-like system that uses easy-to-operate screens to improve plant efficiency and help quickly trouble shoot production line problems. From a single computer, the CommandView control system provides continuous, accurate, real-time information about any piece of Columbia equipment in your plant. Accessible through the Internet, monitor your plant performance from anywhere in the world.

BENEFITS:

- **Central Computer:**
Plant wide control from one computer
- **Remote Access:**
Log into computer through Internet
- **Maximum Uptime:**
Superior troubleshooting tools
- **Customized Reports:**
Management information tailored to your needs
- **Consistent Product Quality:**
Recipe control for consistent performance
- **Easy to Operate:**
Windows-like screens and navigation
