

Columbia

UL CONVERSION KIT:

Rack Loader/Unloader Systems - (UL)

- Loader/Unloader Outboard Valve Conversion Kit:**
 Our Outboard Valve conversion kits available for your two and three block Columbia Loader/Unloaders replace your center mounted Columbia valve with outboard mounted self centering Parker valves.

Features:

Safety

Smoother operation

Fewer mechanical parts

Parker valves

Accessible valves

Benefits:

With Parker self centering valves, the spool automatically returns to the center position stopping flow of hydraulic fluid which stops the carriage, forks from moving if the machine is taken out of the run mode, or if the pump is shut off, or there is a loss of power.

Reduces wear; allows carriage and forks to start and stop smoother.

Less moving parts reduces maintenance cost

Industry standard valves meaning more readily available parts.

Valves are mounted in a more accessible location for ease of maintenance and troubleshooting.
