

PTS - PALLET TRANSPORTER SYSTEM

INCREASE PROFITS BY INCREASING THROUGHPUT

Columbia's pallet transporter system is designed specifically for the producer who wants state-of-the-art equipment and reliable performance on a daily basis. Designed to gently transport pallets into fixed racks. Operation is smooth and gentle to protect green product on the trip to the kiln, and for cured products to the cubing operation. Typical system includes green conveyor, elevator and lowerator, transport (lower) car, finger (upper) car, pallet return conveyors, pallet scraper, brush and cross-over conveyor. Optional turntable available.

SPECS

of tiers: Available from 10 to 27 tiers
Weight Capacities: 25,000 lb (11,340 kg)
40,000 lb (18,000 kg)

BENEFITS

- Designed for maximum pallet handling performance
- Flexible design for "4-block" machines up to large pallet plants
- Can be coupled with an optional pallet accumulator for the optimum in plant efficiency and production flexibility
- Uses advanced PLC controls to ensure accurate placement and pickup of pallets
- Incorporates the latest laser guided positioning components
- Automatic product tracking when coupled with Columbia's industry leading CommandView system
