

TRAC-A-RAC PALLET HANDLING SYSTEM

AUTOMATED RACK HANDLING

Columbia's Trac-A-Rac pallet handling system automatically and efficiently moves racks of product into and out of curing chambers. Coupled with a new or existing Columbia Rack Loader/Unloader system, the Trac-A-Rac eliminates the need for lift truck transport, saving time, labor and money.

The Trac-A-Rac is the perfect automation solution for your new or existing Rack Loader/Unloader System.

SPECS

Pallet Sizes: Up to 21.625" (550 mm) deep and 37" (940 mm) wide
Available Capacities: 12,500 lbs (5669 kgs)
24,000 lbs (10,886 kgs)

BENEFITS

- **Smooth operation to reduce potential product damage**
- **Superior Controls:**
User friendly Allen Bradley PLC and PanelView for easy operator interface
- **Improved Plant Safety:**
No need to have a person around or in kilns
- **Eliminate Lift Trucks from Your Process:**
Reduce cost of lift trucks to handle products
