

1224S HIGH SPEED SPLITTER

COLUMBIA'S FASTEST SPLITTING SOLUTION EVER

The Columbia 1224S High-Speed Splitter is engineered to redefine what high-production splitting looks like. Designed for today's demanding block and paver manufacturers, the 1224S delivers Columbia's fastest splitting performance ever while maintaining the precision, durability, and product quality the industry depends on. With servo-controlled flight bar positioning, recipe-driven split locations, and active centering guides, the 1224S automatically adapts to a wide range of product sizes and split patterns, eliminating guesswork and maximizing throughput. This compact, high-output splitter provides the speed, flexibility, and repeatability required for modern, high-mix production environments, delivering the same premium split quality at significantly higher rates.

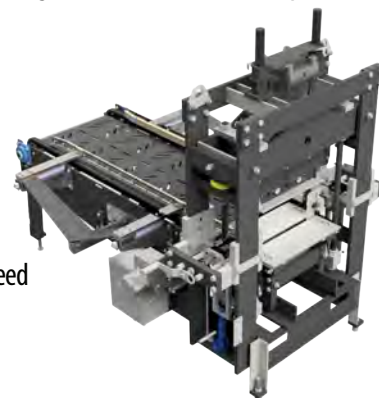

TECHNICAL SPECIFICATIONS

Product Width Range: From 8 5/8" to 22 1/2" (219.075 mm - 571.5 mm)
Product Height Range: 3" - 12" (76.2 mm - 304.8 mm)

BENEFITS

- « Split locations are recipe-driven, enabling easy storage and recall for different products.
- « Servo-controlled flight bar positioning
- « Uses standard splitter hydraulics
- « Active centering guides stabilizes product and ensures correct side knife contact timing
- « Fastest Columbia Splitter Available providing the same high-quality splits you want at the rates you need
